To: Jose Deleon cc: Mary Fulghum, Larry Jensen, Derrick Kimbrough, FREDRICK MICKE
Subject: Lindsay Light II - Issues

Yesterday, we had a meeting. In the meantime, we would like you to contact Jerry F. Crotty, Esquire since he represents Mary's cafe. The only remaining access issues are the six businesses on East Grand and the Adam's Mark. The other issue we would like direction on is a permit issued to C.S. Drilling, a subcontractor to Benchmark Environmental. It appears that Permit # 820771776 is for C. S. Drilling to use a geoprobe to depths of 10 feet in the parkway of 160 East Illinois, 161 East Grand, and 500 North St. Clair. Below is the information we would like to have from both Benchmark and C.S. Drilling :

- 1) Who is performing their health physics oversight?
- 2) Disposal of spoils? Where?
- 3) When will work begin with the geoprobe? Why are they using a geoprobe?
- 4) Screening any samples for radionuclides, etc.
- 5) Client name

6) Historical information they know, since the building is immediately south of Lindsay Light I, 161 East Grand, and East of Lindsay Light II Site/RV3 North Columbus Drive aka Grand Pier. Furthermore, there is contamination in the alley behind 161 East Grand.

- 7) A copy of permit # 820771776

Jose, can a registered letter be sent to both C.S. Drilling or Benchmark?
